

News Release

FOR IMMEDIATE RELEASE

WILMINGTON TRUST ANNOUNCES 2008 THIRD QUARTER RESULTS

Wilmington, Del., October 17, 2008 – Wilmington Trust Corporation (NYSE: WL) reported net income of \$22.9 million for the 2008 third quarter, or \$0.34 per share (on a diluted basis). Third quarter results were reduced by a \$19.7 million securities loss on perpetual preferred stocks issued by the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac). On an after-tax basis, this charge reduced third quarter net income by \$12.5 million, or \$0.19 per share (on a diluted basis). The company initially disclosed this loss in a filing with the Securities and Exchange Commission on September 11, 2008.

On an operating basis (excluding the securities loss), net income for the 2008 third quarter was \$35.4 million, or \$0.53 per share (on a diluted basis). Management believes that operating results present a more relevant measure of ongoing business trends and offer a better basis of comparison with prior periods. The financial statements in this report include a reconciliation of results that include securities losses and impairment charges (reported results) with those that do not (operating results).

“In the face of extraordinary market conditions, we continued to focus on our clients, our business plan, and opportunities for growth, and these efforts were evident in all three of our businesses,” said Ted T. Cecala, Wilmington Trust chairman and chief executive officer. “Compared to the year-ago third quarter, advisory revenue was up 14%, and loan balances were 15% higher, on average. In addition, the net interest margin stabilized, and credit quality remained in line with our historical experience.”

On October 16, 2008, the Board of Directors declared a regular quarterly cash dividend of \$0.345 per share. This amount reflects the 3% increase the Board approved in April 2008, which marked the 27th consecutive year that Wilmington Trust has raised its cash dividend. The quarterly dividend will be paid on November 17, 2008, to stockholders of record on November 3, 2008.

Significant factors in 2008 third quarter results

- On average, \$373.1 million of loans were added during the 2008 third quarter, and loan balances were \$9.46 billion.
- Loan growth, plus stability in the net interest margin, generated net interest income that was 7% higher than for the 2008 second quarter.
- Net charge-offs were lower than for the 2008 second quarter, but the combination of loan growth and higher levels of nonperforming loans caused an increase in the provision for loan losses.
- Corporate Client Services (CCS) revenue was 46% higher than for the year-ago third quarter, with all components of the business contributing to the growth.
- Wealth Advisory Services (WAS) revenue was 2% higher than for the year-ago third quarter, and down slightly from the 2008 second quarter, as financial market volatility reduced trust and investment advisory revenue.
- Affiliate money manager Roxbury Capital Management (RCM) returned to profitability.
- On a combined basis, advisory fees from CCS, WAS, and the affiliate money managers generated 52% of total net interest and noninterest income for the quarter (excluding securities losses and after amortization and the provision for loan losses), and 30% of pre-tax operating net income.
- Operating expenses and the number of staff members were higher than for the year-ago third quarter, mainly because the year-ago figures did not reflect the acquisition of AST Capital Trust Company (AST), which added approximately 179 staff members in Phoenix, Arizona, and Wilmington, Delaware.
- Compared to the 2008 second quarter, operating expenses were 2% higher. Most of this increase was in salaries and primarily reflected the additions of:
 - WAS staff in the family office practice and Boston office.
 - CCS capital markets and retirement services staff.
 - Regional Banking staff in the Maryland, New Jersey, and Pennsylvania markets.
- All regulatory capital ratios continued to exceed the amounts required by the Federal Reserve Board to be considered a well-capitalized institution.

Corporate Client Services

Capital markets revenue was 17% higher than for the year-ago third quarter, due to demand for services that support tender option bonds, repackaged corporate and municipal debt, and corporate defaults and bankruptcies. This activity was not strong enough to offset the absence of capital markets transactions in the 2008 third quarter, which is why revenue from these services was slightly lower on a linked-quarter basis.

Retirement services revenue reflected the April 2008 acquisition of AST, which assumed the Wilmington Trust name in August 2008. The 2008 third quarter marked the first full quarter of revenue and expenses from this acquisition.

Continued weakness in the capital markets overall also affected entity management revenue, which was up 4% from the year-ago third quarter, but 11% lower than for the 2008 second quarter.

Demand remained high for CCS investment and cash management services. Revenue from these services was up 17% from the year-ago third quarter and 3% from the 2008 second quarter.

The CCS business produced 14% of the company's total pre-tax operating net income for the 2008 third quarter.

Wealth Advisory Services

Significant volatility in the financial markets masked new business development in WAS. Trust and investment advisory revenue was 3% lower than for the year-ago third quarter, and 2% lower than for the 2008 second quarter. In comparison, at September 30, 2008, the Standard & Poor's 500 Index was 24% lower than at September 30, 2007, and 9% lower than at June 30, 2008. Management uses the S&P 500 as a benchmark for comparison because its composition mirrors, to a large extent, the mix of equities in client portfolios.

Revenue from planning and other services was 9% higher than for the year-ago third quarter, primarily reflecting demand for family office services. Compared to the 2008 second quarter, planning revenue was unchanged, as new business development was offset by lower revenue from tax services, which typically are highest in the second quarter of each year.

Mutual fund fees were 28% higher than for the year-ago third quarter, and 6% higher than for the 2008 second quarter. The increase resulted mainly from asset inflows in the Wilmington U.S. Government Money Market Fund and the Wilmington Tax-Exempt Money Market Fund, as some clients opted to place funds in less volatile instruments than equities.

Most of Wilmington Trust's mutual funds are money market funds. Three of these funds – the Wilmington Prime Money Market Fund, the Wilmington U.S. Government Money Market Fund, and the

Wilmington Tax-Exempt Money Market Fund – have applied to participate in the new insurance protection available under the U.S. Treasury Department’s Temporary Money Market Guarantee Program. These funds are managed to maintain a stable \$1.00 share price. While none has ever slipped from that level, the company’s participation in the voluntary Treasury Department program is designed to offer mutual fund shareholders additional assurance in light of the extraordinary market conditions that prompted the creation of the program. More information about this is available at www.wilmingtontrust.com under Media/Press Releases/October 3.

Regional Banking

- The Regional Banking business continued to benefit from economic conditions in the mid-Atlantic region, where unemployment rates remained below the U.S. average. Delaware’s unemployment rate for August 2008 (the most recent data available) was 4.9%, compared with the U.S. average of 6.1%. The August unemployment rate was 5.8% for Pennsylvania, 5.9% for New Jersey, and 4.5% for Maryland.
- Loan balances, on average, were \$9.46 billion. This was 15% higher than for the year-ago third quarter, and 4% higher than for the 2008 second quarter.
- At period-end, loan balances were \$9.59 billion, up 15% year-over-year and up 3% from the 2008 second quarter. The Delaware market accounted for approximately 54% of total period-end loans; the Pennsylvania market accounted for approximately 24%; and the Maryland market accounted for approximately 10%.
- Commercial loan balances were \$6.55 billion, on average, for the 2008 third quarter. This was 17% higher than for the year-ago third quarter, and 5% higher than for the 2008 second quarter. At period-end, commercial loan balances were \$6.67 billion. The Delaware market accounted for approximately 55% of commercial loans at period-end; the Pennsylvania market accounted for approximately 27%; and the Maryland market accounted for approximately 9%.
- The largest linked-quarter increase in loan balances (on a dollar-amount basis) was in commercial and industrial loans (recorded as commercial, financial, and agricultural loans). These loans were to clients mainly in the Delaware and Pennsylvania markets, and represented a variety of industry sectors.
- The increase in commercial mortgages reflected business from clients who, until recent changes in the credit markets, had found more favorable financing terms with specialty mortgage lenders.
- Consumer loan balances were \$1.78 billion, on average, up 16% from the year-ago third quarter and 3% from the 2008 second quarter. Most of this growth was in home equity lines of credit and indirect loans.

Consumer loans, on average (in millions)	2008 Q3	2008 Q2	2007 Q3
Home equity lines of credit	\$ 349.7	\$ 327.2	\$ 298.2
Indirect loans	952.3	889.6	715.8
Credit card loans	67.3	67.4	64.8
Other consumer loans ¹	411.0	445.6	454.2
Total consumer loans	\$ 1,780.3	\$ 1,729.8	\$ 1,533.0

¹ Includes home equity loans, installment loans, and other types of loans to individuals.

- On average, core deposits were up 8% from the year-ago third quarter, mainly due to increases in savings deposits generated by WTDirect, the company's online distribution channel. Compared to the 2008 second quarter, core deposits were slightly higher.

Credit quality in the 2008 third quarter

Compared to the 2008 second quarter, net charge-offs decreased, but nonperforming asset levels increased. The combination of this increase and loan growth, plus risk rating downgrades, caused the provision and reserve for loan losses to increase. The percentage of loans with pass ratings in the internal risk rating analysis remained at 96%.

The provision for loan losses was \$19.6 million, up from \$18.5 million for the 2008 second quarter. The reserve for loan losses increased to \$122.2 million from \$113.1 million at June 30, 2008. The loan loss reserve ratio increased 5 basis points from the 2008 second quarter to 1.27%.

Nonaccruing loans were \$28.5 million higher than for the 2008 second quarter. Two client relationships accounted for most of this increase. These relationships were with commercial real estate construction clients with single-family housing projects in central and southern Delaware.

Other real estate owned decreased \$2.2 million from June 30, 2008, due to the successful disposition of properties in a luxury home development in Montgomery County, Pennsylvania.

Loans past due 90 days or more were \$6.9 million higher than for the 2008 second quarter.

Approximately \$4.9 million of this amount was for a commercial construction/real estate loan to a Maryland-based client.

Total net charge-offs for the 2008 third quarter were \$10.5 million, down from \$11.8 million for the 2008 second quarter, mainly because there were no commercial real estate/construction charge-offs. There was a \$2.0 million increase in commercial, financial, and agricultural loan charge-offs. This increase was associated mainly with one previously nonaccruing loan to a sports equipment retailer.

The net charge-off ratio for the second quarter was 11 basis points, down from 13 basis points for the 2008 second quarter. The year-to-date net charge-off ratio was 30 basis points.

Commercial loan charge-offs are inherently unpredictable, mainly because:

- Negotiations with commercial borrowers can affect the timing and extent of charge-offs, or avert them altogether.
- Associated legal proceedings can also affect the timing and extent of charge-offs.

On a percentage basis, the composition of the loan portfolio remained relatively unchanged. Additional disclosures about credit quality appear in the financial statement section of this release.

Net interest margin

The net interest margin was 3.27%, which was 10 basis points higher than for the 2008 second quarter, but 46 basis points lower than for the year-ago third quarter. These changes reflected the company's asset-sensitivity and the market interest rate environment.

Between late September 2007 and May 2008, the Federal Open Market Committee (FOMC) reduced rates seven times for a total of 325 basis points. With most of the company's floating rate loans repricing within 30 days of a rate change, loan yields began to reflect the downward pricing adjustments in the 2007 fourth quarter and continued in the first half of 2008.

Most of the corresponding decreases in funding costs did not begin until the 2008 first quarter, however, because funding costs typically take 90 to 120 days to reprice. Funding costs continued to lag loan repricing for most of the second quarter. In the third quarter, as market interest rates remained stable, the disparity between the repricing of loans and the repricing of funding costs narrowed substantially.

The FOMC's 50-basis-point rate reduction on October 8 will compress the margin. It is difficult to forecast accurately how other aspects of current dislocation within the credit markets, especially the

disparity between the federal funds target rate and the 30-day London interbank offered rate (Libor), also might affect the margin. At September 30, 2008, the federal funds target rate was 2.00%, while the 30-day Libor was 3.93%.

The pricing on approximately 40% of Wilmington Trust's commercial loans is tied to the 30-day Libor. In the near term, upward repricing of these loans will offset some of the margin compression that will be caused by the recent FOMC rate reduction. Eventually, however, higher Libor rates will be a factor in funding costs, which will cause the margin to narrow. The exact path and speed with which Libor adjusts will affect the extent and timing of the effect on the margin.

Should term Libor rates return to their historic relationship with federal fund rates, management expects approximately 7 basis points of margin compression over a 12-month period after all loan and funding repricing has occurred. More information about asset/liability matching and funding sources is in the supplemental information statement in this release.

Common equity offering

On September 22, 2008, Wilmington Trust initiated an at-the-market offering of its common stock. This offering is described in a base prospectus and prospectus supplement filed with the Securities and Exchange Commission on September 22, 2008. These documents are available at www.wilmingtontrust.com under Investor Relations/SEC Filings.

Under this offering, Wilmington Trust may issue shares for up to an aggregate sales price of \$150 million. The proceeds of this offering will be used for general corporate purposes.

Sales of these shares will occur through ordinary brokers' transactions on the New York Stock Exchange or otherwise at market prices prevailing at the time of the sale, at prices related to the prevailing market prices, at negotiated prices, with Merrill Lynch acting as sales agent. Wilmington Trust and Merrill Lynch will determine jointly, as often as daily, how many shares to sell under this offering and at what price to sell them. Shares will be available under this offering until the aggregate sales price of \$150 million is reached, or until Wilmington Trust or Merrill Lynch decide to terminate it.

During the 2008 third quarter, 695,900 shares were issued under this offering. Gross proceeds were \$20.8 million, with an average sale price of \$29.95 per share. Net of commissions, proceeds totaled \$20.4 million, with an average sale price of \$29.35 per share.

Investment securities portfolio

Wilmington Trust maintains an investment securities portfolio for its own account to generate cash flow, to help manage interest rate risk, and to provide collateral for deposits and other liabilities. There are no client funds in this portfolio.

At September 30, 2008, the value of the investments in this portfolio was \$1.46 billion, which was 4% lower than at June 30, 2008. Two types of investments accounted for most of this decrease:

- Perpetual preferred stock issued by Fannie Mae and Freddie Mac, which is included in the preferred stock recorded on the balance sheet.
- Trust-preferred securities (TruPS), which are included in the amount on the balance sheet recorded as other securities.

Fannie Mae and Freddie Mac securities loss

On September 7, 2008, the U.S. government placed Fannie Mae and Freddie Mac into conservatorship. This action triggered impairment testing under U.S. generally accepted accounting principles (GAAP). As a result, management determined that the value of Wilmington Trust's investments in perpetual preferred stock issued by Fannie Mae and Freddie Mac had declined from \$21.1 million at June 30, 2008, to \$1.4 million as of September 10, 2008.

Management further determined that this decline, or impairment, was other-than-temporary under GAAP. The \$19.7 million decrease was recorded as a securities loss for the 2008 third quarter. This charge did not affect client funds, the company's ability to pay dividends, or the company's status as a well-capitalized institution under Federal Reserve Board guidelines.

In addition to the Fannie Mae and Freddie Mac securities, Wilmington Trust's investment securities portfolio includes perpetual preferred stocks issued by two money center banks and one other company. These stocks are held as available-for-sale. At September 30, 2008, the combined value of all these perpetual preferred stocks was \$19.4 million. This represented approximately 1% of Wilmington Trust's total investment securities portfolio.

Trust-preferred securities

Wilmington Trust's TruPS portfolio consists of 38 pooled issues and 9 single-issue securities. The single issues are from money center and large regional banks. The pooled instruments consist of securities

issued by banks, insurance companies, and other financial institutions. The pooled TruPS generally are secured by over-collateralization or default protection provided by subordinated tranches. All of the TruPS in the portfolio are structured as “payment-in-kind” securities. This means that, should an issuer defer a scheduled interest payment, the principal held by the investor increases by the amount of the deferred payment.

At June 30, 2008, the estimated fair value of the TruPS portfolio was \$227.2 million. On July 31, 2008, management changed the accounting treatment for the TruPS portfolio from “available for sale” to “held to maturity,” because the company has the ability and intent to hold these securities until they mature. As of that date, the estimated fair value of these securities was \$189.1 million, and the \$38.1 million decline in value from June 30, 2008, was recorded on the balance sheet.

As of September 30, 2008, the estimated fair value of the TruPS portfolio was \$207.9 million, and there were no other-than-temporary impairments among the securities in this portfolio. No further adjustments for changes in the fair value of TruPS were reflected on the balance sheet, because the TruPS are recorded as held-to-maturity securities.

Conference call

Management will discuss 2008 third quarter results and outlook for the future in a conference call today at 10:00 a.m. (Eastern). Supporting materials, financial statements, and audio streaming will be available at www.wilmingtontrust.com.

To access the call from within the United States and Canada, dial 877-407-8031. Callers outside the United States and Canada should dial 201-689-8031. No passcode is necessary.

A rebroadcast of the conference call will be available from 1:00 p.m. (Eastern) today until 11:59 p.m. (Eastern) on Friday, October 24. To access the rebroadcast from within the United States and Canada, dial 877-660-6853. Callers outside the United States and Canada should dial 201-612-7415. All callers will need to use account # 286 and replay ID # 299744 to access the rebroadcast.

Forward-looking statements

This report contains forward-looking statements that reflect our current expectations about our future performance. These statements rely on a number of assumptions and estimates and are subject to various risks and uncertainties that could cause our actual results to differ from our expectations. Factors that could affect our future financial results include, among other things, changes in national or regional economic conditions; changes in market interest rates; significant changes in banking laws or regulations; increased competition in our businesses; higher-than-expected credit losses; the effects of acquisitions; the effects of integrating acquired entities; a substantial and permanent loss of either client accounts and/or assets under management at Wilmington Trust and/or our affiliate money managers, Cramer Rosenthal McGlynn and Roxbury Capital Management; unanticipated changes in regulatory, judicial, or legislative tax treatment of business transactions; and economic uncertainty created by unrest in other parts of the world.

About Wilmington Trust
